Allowable Subject Matter

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest an integrated electronic system housing and magnet structure for an imaging system comprising a housing attached to and external from said magnet structure, said housing containing imaging system support electronics having a controller and not said RF coil assembly in combination with the remaining limitations of the claim.
 - b. With respect to claim 13, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest an imaging system comprising a first housing external, separate, and coupled to said magnet structure and containing imaging system support electronics having a microprocessor and not said RF coil assembly in combination with the remaining limitations of the claim.
 - c. With respect to claim 22, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest an imaging system comprising a first housing having imaging system support electronics comprising at least one of a RF amplifier, a gradient amplifier, a timing device, an oscillator, a RF transmitter, a gradient coil controller, and a sequence controller; and a second housing

integrally formed with said first housing in combination with the remaining limitations of the claim.
